About

"Veronica has shown many valuable traits as a developer. She is curious, thorough, and has great problem-solving skills. She wants to improve things and isn't afraid to question solutions. Veronica has also impressed me with her ability to work independently, far more than I initially expected. Socially, she has been a joy to work with. She is happy, social, and communicative, which has greatly contributed to a positive and collaborative work environment. She gets along well with everyone and has built strong relationships across different departments."

/Amanda Olsson Front End Developer and mentor, Oneflow AB
